Cancer Letters, 71 (1993) v–vi
Elsevier Scientific Publishers Ireland Ltd.

Contents

Volume 71

Assessment of the mutagenic activity of some acenaphtho(1,2-b)quinolines
J.K. Ray and G.K. Kar (Kharagpur, India) 1–3
Release of intracellular calcium by prenylamine in human ovarian tumour cells
L.D. Popper and S.C. Batra (Lund, Sweden) 5–10
Gap junctional intercellular communication in mouse lung epithelial cell lines: effects of cell transformation and tumor promoters
R. Chaudhuri, K. Sigler, E. Dupont, J.E. Trosko, A.M. Malkinson and R.J. Ruch (Toledo, OH; East Lansing, MI and Denver, CO) 11–18
Chemopreventive effects of tamoxifen in ethyl methanesulphonate-induced rat mammary carcinogenesis
H. Ueo, H. Matsuoka, M. Honda, H. Inoue, R. Takaki and T. Akiyoshi (Beppu and Oita, Japan) 19–24
A study of tobacco carcinogenesis. LI. Relative potencies of tobacco-specific *N*-nitrosamines as inducers of lung tumours in A/J mice
D. Hoffmann, M.V. Djordjevic, A. Rivenson, E. Zang, D. Desai and S. Amin (Valhalla, NY) 25–30
Formation and growth of multicellular spheroids in media containing low concentrations of agarose
Y. Kuwashima, T. Yamada, M. Saio and T. Takami (Gifu-shi, Japan) 31–33
The effects of phenethyl isothiocyanate on benzo[*a*]pyrene-induced tumors and DNA adducts in A/J mouse lung
G. Adam-Rodwell, M.A. Morse and G.D. Stoner (Toledo, OH and Columbus, OH) 35–42
Antiproliferative action of the steroid RU486 in cultured human lymphoma cells
C. Schuster, S. Chasserot-Golaz and G. Beck (Strasbourg, France) 43–50
Formation of DNA adducts and oxidative DNA damage in rats treated with 1,6-dinitropyrene
Z. Djurić, D.W. Potter, S.J. Culp, D.A. Luongo and F.A. Beland (Detroit, MI; Spring House, PA and Jefferson, AR) 51–56
Antipromoting effects of 5-lipoxygenase inhibitors, 3-nitro-2,4,6-trihydroxybenzamide derivatives, on TPA-promoted transformation in BALB 3T3 cells
M. Semba, I. Honda, M. Shibagaki and Y. Nishi (Kanagawa and Tochigi, Japan) 57–60
A nude rat model for in vivo studies of human transitional cell carcinogenesis
C.Y. Wang, R.F. Jones, K. Zukowski, K. Imaida and G.P. Haas (Detroit, MI and Nagoya, Japan) 61–65
Abnormalities of retinoblastoma gene structure in human lung tumors
S. Linardopoulos, E.S. Gonos and D.A. Spandidos (Athens and Heraklion, Greece; London, UK) 67–74
Tumor promotion in a breast cancer model by exposure to a weak alternating magnetic field
W. Löscher, M. Mevissen, W. Lehmacher and A. Stamm (Braunschweig, Germany) 75–81
Induction of hepatic nodules in the rat by aristolochic acid
M.R. Rossiello, E. Laconi, P.M. Rao, S. Rajalakshmi and D.S.R. Sarma (Toronto, Ontario) 83–87
Alterations in populations of GST-*p*-immunoreactive single hepatocytes and hepatocellular foci after a single injection of *N*-nitrosodiethlyamine with or without phenobarbital promotion in male F344/NCr rats
J.-J. Jang, J.R. Henneman, Y. Kurata, H. Uno and J.M. Ward (Frederick, MD) 89–95
A marine natural product, patellamide D, reverses multidrug resistance in a human leukemic cell line
A.B. Williams and R.S. Jacobs (Santa Barbara, CA) 97–102
Involvement of down-regulation-resistant protein kinase C in teleocidin inhibition of cell proliferation and calcium mobilization induced by epidermal growth factor and vasopressin in human hepatoma cells
Y. Kaneko, A. Tsukamoto and K. Kurokawa (Tokyo, Japan) 103–108

Carcinoembryonic antigen mediates in vitro cell aggregation induced by interferon-γ in a human colon cancer cell line: requirement for active metabolism and intact cytoskeleton
T. Kanai, T. Hibi, A. Hayashi, J. Takashima, M. Shiozawa, S. Aiso, K. Toda, Y. Iwao, M. Watanabe and M. Tsuchiya (Tokyo, Japan) 109–117
Expression of the hepatocyte growth factor receptor in the regenerating rat liver
Y. Hoshino, N. Enomoto, N. Sakamoto, M. Kurosaki, T. Ikeda, F. Marumo and C. Sato (Tokyo, Japan) 119–123
Transforming growth factor β1-induced delay of cell cycle progression and its association with growth-related gene expression in mouse fibroblasts
T.A. Kim, A.F. Cutry, A.J. Kinniburgh and C.E. Wenner (Buffalo, NY) 125–132
Expression of TRPM-2 during involution and regeneration of the rat liver
L.M. Helvering, K.K. Richardson, D.M. Horn, K.A. Wightman, R.L. Hall, W.C. Smith, J.A. Engelhardt and F.C. Richardson (Greenfield, IN) 133–142
Interleukin-6 and tumour necrosis factor alpha synergistically block S-phase cell cycle and upregulate intercellular adhesion molecule-1 expression on MCF7 breast carcinoma cells
P. Bajaj, J. Lawry, G. Shenton and R.C. Rees (Sheffield, UK) 143–149
Increased risk of lung cancer in Japanese smokers with class mu glutathione *S*-transferase gene deficiency
M. Kihara, M. Kihara, K. Noda and N. Okamoto (Yokohama, Japan) 151–155
Gap junctional intercellular communication and connexin expression in normal and SV 40-transformed human liver cells in vitro
D.J. Fitzgerald, S.H.H. Swierenga, M. Mesnil, C. Piccoli, N. Marceau and H. Yamasaki (Adelaide, Australia; Ottawa, Canada; Lyon, France and Quebec, Canada) 157–165
Tri-*n*-butyltin chloride promotes morphological transformation and induces proliferin expression in C3H10T1/2 cells
C.L.J. Parfett and R. Pilon (Ottawa, Ontario) 167–176
Retinoic acid induces insulin-like growth factor II expression in a neuroblastoma cell line
T. Ueno, S. Suita and Y. Zaizen (Fukuoka, Japan) 177–182
Diamine oxidase activity in rat brain carcinogenesis and in gliomas
A. Sessa, E. Broglia, M.R. Terreni and A. Perin (Milan, Italy) 183–187
Somatostatin analog RC-160 and bombesin/gastrin-releasing peptide antagonist RC-3095 inhibit the growth of androgen-independent DU-145 human prostate cancer line in nude mice
J. Pinski, G. Halmos and A.V. Schally (New Orleans, LA) 189–196
Argyrophilic nucleolar organizer regions (AgNORs) in inflammatory pre-malignant and malignant lesions of the uterine cervix
S. Lahshmi, S.A. Nair, K. Jayasree, P.G. Jayaprakash, T.N. Rajalekshmy, S. Kannan and R. Pillai (Thiruvanathapuram, India) 197–201
Production of multiple growth factors by a human non-small cell lung carcinoma cell line
N.L. Occleston and C. Walker (Bebington, UK) 203–210
Subject Index 211–213
Author Index 215–216
